

What we do...

Office furniture...

Your office space is like a business card – and here you spend the majority of your day. Whether a desk, a conference table or an office furniture system – we connect design, high functionality and ergonomics to a comprehensive solution for you and your employees and respond to your individual requirements. An office space should be as individual as the person using it!

Hotel interior...

Hotel facilities need special attention paid by the outfitter. Together with you we develop a concept that fits to your requirements and exceed all of your clients' expectations. With attention to details and an eye for the little things we can make your hotel an extraordinary experience!

Object design...

We gladly advise you on furnishing of restaurants just as well on training classrooms. Based on a creative and professional basis we put your wishes into practice!

Modular buildings...

Remain flexible! Fast and at reasonable costs we provide you with our turnkey prefabricated buildings of all types. Of course we support you in all technical cases to minimize your effort and also realize fully furnished modules. Whether in case of temporary school- or office buildings, we are happy to assist you with any query!
