Slimm catalogue

The ideal balance between user-friendliness and subtle design. Besides rectangular desktops, you also have SLIMM's alternative shape that give the design its special character. Just a little more depth or a little more surface area: it's all part of SLIMM.

SLIMM is functionality at its best. It's designed from the ground up. The slim T-leg is standard height-adjustable from 62 to 85 cm - the adjustment can be made mechanically or electrically. Horizontal and vertical cable management can be easily incorporated. Smart accessories are part of the unique and clever SLIMM concept.

SLIMM allows you to make clever use of the floor-space and depth of buildings. For example, meeting spaces in the direct vicinity of the workplace. For this, SLIMM offers a range of solutions. Small mobile pedestals give extra space for movement underneath workplaces.

We design your office!

We improved the slimm-collection and developed diverse solutions Manufacturing in our in-house production allows us to respond to your specific needs and to produce according to your measurements.

ABS - Because a workplace should be as unique as the person who uses.

We design your office!

- plenty of clean desk space with our new ABS divider wall
